I. FOREIGN CURRENCY

Transactions in foreign currencies are recorded at the exchange rates prevailing on the date of transaction. Foreign currency monetary assets and liabilities remaining unsettled at the year end are translated at the year end rate and difference in translation is recognized in the Preoperative Expenditure Account.

J. CASH FLOW STATEMENT

Cash flows are reported using the indirect method, whereby net profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

K. TAXES ON INCOME

Current Tax

Current Tax is determined as the amount of tax payable in respect of taxable income for the year.

Deferred Taxation

Deferred tax reflects the tax effects of timing differences between accounting income and the taxable income for the period. The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantially enacted by the Balance Sheet date. Deferred tax assets are recognized only if there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. Deferred tax assets, if any, are reviewed as at each Balance Sheet date to reassess realization.

L. IMPAIRMENT OF ASSETS

At each Balance Sheet date, the Company reviews the carrying amounts of its fixed assets to determine whether there is any indication that those assets suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using pre-tax discount rate that reflects current market assessments of time value of money and the risks specific to the asset.

M. PROVISIONS AND CONTINGENT LIABILITIES

The Company recognizes a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.
